

# GRADUATION: The Measure of Tomorrow

65<sup>TH</sup> CONFERENCE ON EXCEPTIONAL CHILDREN

## DIGITAL DIFFERENTIATION

With Google and other Stuff!

<https://sites.google.com/a/nhcs.net/digital-differentiation/>

We will learn ways to:

- Design Student-Driven Learning Experiences
- Provide Flexible Learning Paths
- Provide ways to use Digital Tools for Learning not for the product!

While having students learn that they need to advocate for themselves and know how they can best produce the product, do they all really have to use different tools? In the private world of work often times certain software's are used by a company. Should we be teaching our students how to look for accessible ways to use the products they have to work with?
